

Setting up Application Environment

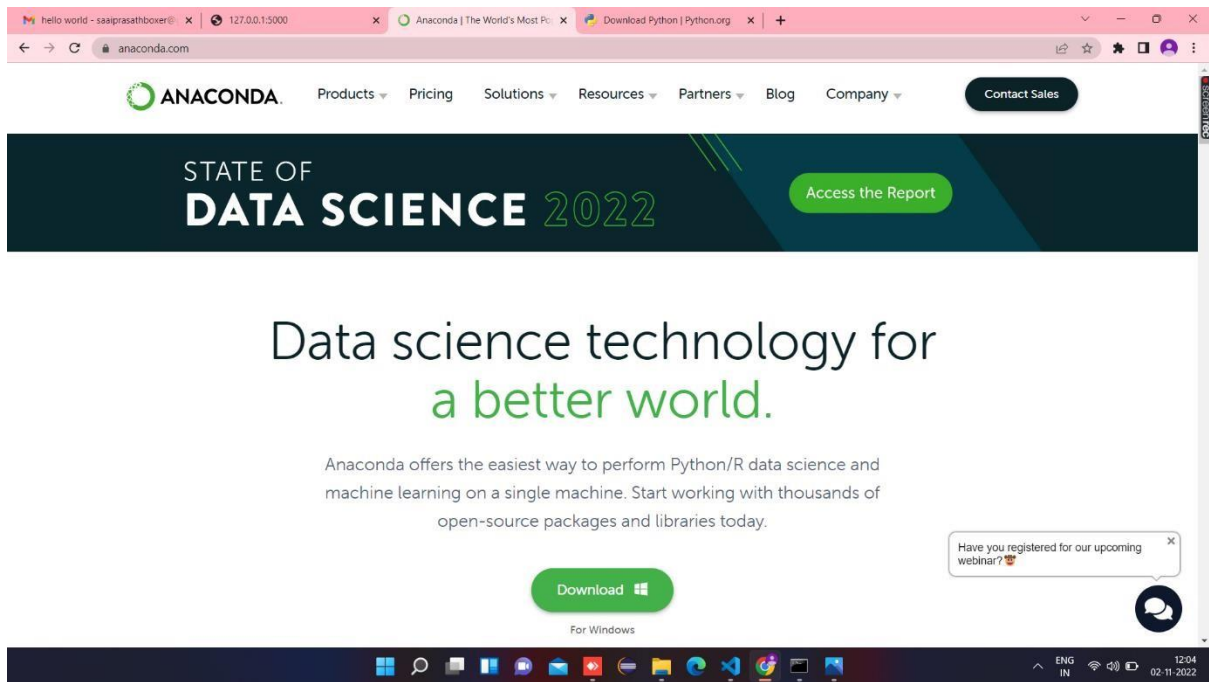

Create a Flask Project

Date	10 November 2022
Team ID	PNT2022TMID16490
Project Name	Skill / job Recommender Application
Maximum Marks	

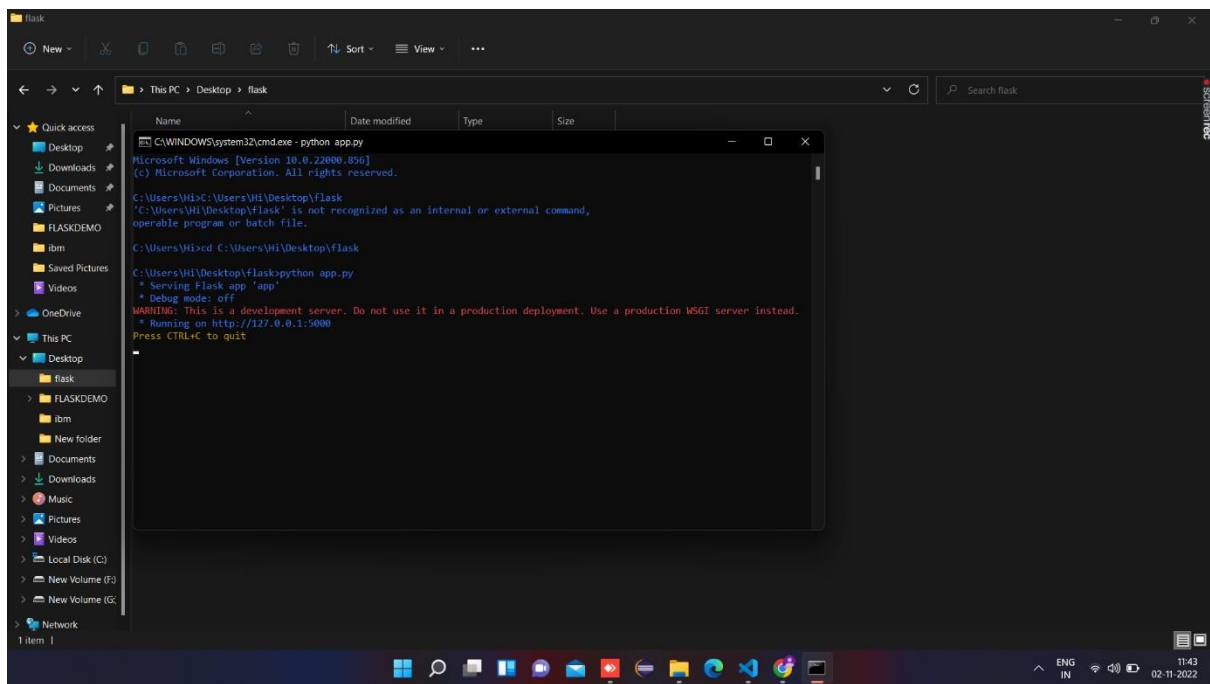

Step 1: Install Python latest version from python.org.

Step 2: Download Anaconda from <https://www.anaconda.com/> and install it by running the .exe file.

Step 3: Install Flask using command `pip install flask`.

Step 4: Open a new Python file and start coding

```
from flask import Flask
app = Flask(__name__)
@app.route("/") def
helloworld(): return
```

```
"Hello World!" if
__name__ == "__main__":
app.run(debug=True)
```

Step 5: Run the python file using command `python filename.py`.

```
Traceback (most recent call last):
  File "main.py", line 1, in <module>
    from flask import Flask
ModuleNotFoundError: No module named 'flask'

...Program finished with exit code 1
Press ENTER to exit console.
```

Step 6: Open the IP in browser.
